

The Age of The Earth

- ✦ *Any attempt to date the earth relies on the extrapolation of modern processes into the past.*
- ✦ *Once this uniformitarian concept is adopted then the assumptions can be formalized.*
- ✦ *They are:*
 - 1. The process(decay) has been constant or changed by a known degree.**
 - 2. The process has been closed to outside influences or changed by known amount.**
 - 3. The result of the process has come only through the process or the initial amount is known.**

Evidence of a Worldwide Flood

- ❖ *All ancient cultures have stories of a worldwide flood.*
- ❖ *Even Mt. Everest has water deposited fossil bearing layers in its uppermost region.*
- ❖ *Where did the waters go? Amos 9:6, Job 38:8-11, Psalm 104:6-9*

Where Did the Water Come From?

✦ *The Major Source is listed as the fountains of the deep – Gen 7:11-24*

✦ **Gen 2:5-6 says there was a mist to water the whole face of the ground. Wouldn't this imply a great deal of water below the surface? Also See Gen 2:10**

✦ *Rain for 40 days and nights?*

✦ **Not presently enough clouds around the earth for this.**

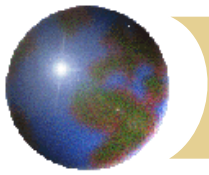

✦ **Was it different then?**

- Animal fossils and vegetation at both poles
- No rainbow in the sky

✦ **Water Above the Heaven? – Gen 1:6-8**

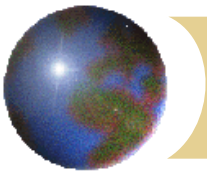

- Estimated would need to be equivalent of 12 Meters Liquid H₂O

✦ **Birds Fly in Heaven – Gen 1:20**

What Happened To The Dinosaurs?

- ✦ *Dinosaur – “Terrible Lizard” 1841*
 - ✦ **Technically refers to giant reptile like land creatures**
 - ✦ **1825 called “Iguanodon” named after a tooth that looked like that of a giant Iguana.**
 - ✦ **1677 bones found were thought to be from extinct giant elephant.**
- ✦ *Dinosaurs were supposed to live (and die) 65 million yrs. Ago during the Mesozoic Era.*
- ✦ *Most people think all dinosaurs were huge creatures when in fact a relatively few number were huge and even evolutionists believe these were very old specimens. Many dinosaurs were quite small from the size of an ostrich to a chicken.*
- ✦ *Would T. Rex have eaten plants? What about the teeth and claws of the Giant Panda which mainly eats Bamboo*

What Happened To The Dinosaurs?

✚ *Is there evidence man and dinosaurs have lived together?*

✚ **Many different cultures have dragon legends**

- 3000 bc Sumerian story of huge vicious dragon
- Alexander the great – India – worshipped huge hissing reptiles they kept in caves.
- China has been renowned for their stories of dragons and it is featured prominently upon their art.
- England has story of St. George slaying a dragon.
- Tenth century ad has story of an Irishman that has an encounter that reads as if he had an encounter with a *Stegosaurus*.
- 1500's European Science book *Historia Animalium* which list several animals which to us are dinosaurs.
- 1572 a naturalist describes an encounter between a peasant and a dragon whose description matches that of a *Tanystropheus*.
- Job 40:15; 41:1-34
